

NanoGAS®-FMT Timeline

A general reference for international patients | Estimated total timeline: 6-9 months

NOTE

- This timeline is provided as a general reference for international patients.
- Actual timing, number of visits, and length of stay may vary depending on doctor availability, the patient's condition, the treatment plan, and travel arrangements.
- Standard treatment typically involves 3-6 transplants.
- In some cases, a stay of up to one month or longer may be required.
